PROFESSIONAL SUMMARY

Junior React Developer and MERN Stack fresher with 6 months of hands-on production internship experience building responsive, component-based web applications. Independently delivered 4 end-to-end full-stack projects using React.js, Redux Toolkit, Node.js, Express.js, and MongoDB. Skilled in REST API integration, JWT authentication, role-based access control, and mobile-first responsive UI development with Tailwind CSS and Ant Design. Trained through an intensive Full Stack Development program and experienced in Agile and Scrum workflows with a strong focus on clean, maintainable code and frontend performance optimization.

TECHNICAL SKILLS

EXPERIENCE

React and Full Stack Developer Intern | Right UpNext Innovations Sep 2025 – Mar 2026

Coimbatore, Tamil Nadu | Promoted to paid intern within 3 months (Dec 2025)

Built and maintained 10+ React.js-based frontend features — developing reusable components, managing application state with Redux Toolkit, and integrating REST APIs across real-time production projects, reducing UI build time by approximately 25%.

Worked end-to-end across the full stack (React frontend and Node.js/Express backend) within an Agile team, participating in sprint planning, stand-ups, and code reviews across 4+ sprint cycles.

Diagnosed and resolved 15+ production bugs in both frontend and backend layers, improving application reliability and reducing error frequency by approximately 30%.

Recognised for strong initiative and performance — transitioned from an unpaid intern to a paid role within 3 months, ahead of the standard timeline.

PROJECTS

Tendwood — Travel and Tourism Platform | github.com/kishorekrish1122/Tendwood

React | Redux Toolkit | Node.js | Express | MongoDB | JWT | Ant Design | Tailwind CSS

Architected a full-stack travel platform serving 2 separate portals (client and admin) using React, with lazy-loaded protected routes and role-based access control via JWT authentication — reducing unauthorized access attempts to zero in testing.

Designed Redux Toolkit state management with 5 feature slices (users, countries, destinations, travel, packages) — enabling predictable and scalable state across 20+ components.

Built an admin dashboard with a package itinerary builder, Cloudinary file upload, and a fully responsive UI using Ant Design and Tailwind CSS — compatible across all major browsers and screen sizes.

Coloroom — Interior Design Services Website | github.com/kishorekrish1122/coloroom-frontend

React | React Router DOM | Tailwind CSS | Lucide React | Vite

Developed a 9-page multi-service website using React Router DOM, building 12+ reusable components (Navbar, Footer, Banner, Cards) that reduced per-page development time by 40%.

Implemented responsive layouts with smooth navigation, scroll-to-top, WhatsApp widget, and a dynamic gallery and subscription section — achieving full mobile compatibility across 5+ device sizes.

Delivered performance-optimised production builds using Vite with clean component separation, achieving fast initial load times across all service categories.

NKM Infinity — Industrial Business Website | github.com/kishorekrish1122/nkm-infinity

React | Tailwind CSS | React Router DOM | Cloudinary | Vite

Built a production-quality 5-page business website with an animated hero slideshow, floating particle animations, and Cloudinary-hosted imagery — achieving a mobile-first responsive design throughout all screen breakpoints.

Structured multi-page navigation (Home, Products, Services, About, Contact) with React Router DOM and clean component separation, enabling easy content maintenance and future scalability.

CRM Demo — Customer Relationship Management System | github.com/kishorekrish1122/CRM-DEMO

React.js | JavaScript (ES6+) | Node.js | Express.js | MongoDB | REST API | Apr 2026 – May 2026

Built a full-stack CRM application using React.js, Node.js, Express.js, and MongoDB — implementing customer management, lead tracking, and CRUD operations across 5+ core modules with full REST API integration.

Developed responsive user interfaces with form handling and real-time data management, streamlining customer data operations and reducing manual data entry steps by approximately 40%.

EDUCATION

M.Sc. — Electronics and Communication Systems | Hindustan College of Arts and Science, Coimbatore 2023 – 2025

CGPA: 7.5 / 10 | Relevant coursework: Data Structures, Computer Networks, Algorithms

B.Sc. — Electronics and Communication Systems | Hindustan College of Arts and Science, Coimbatore 2020 – 2023

CGPA: 7.5 / 10 | Final Project: IoT-based Smart Home Automation (embedded systems and programming)

CERTIFICATIONS

Full Stack Development Program (6 Months) — Intellipaat, 2025

Responsive Web Design — Intellipaat, 2025

JavaScript Algorithms and Data Structures — Intellipaat, 2025

React — The Complete Guide — Intellipaat, 2025

Node.js and Express Bootcamp — Intellipaat, 2025
